

Db2 11.5.7 New Features

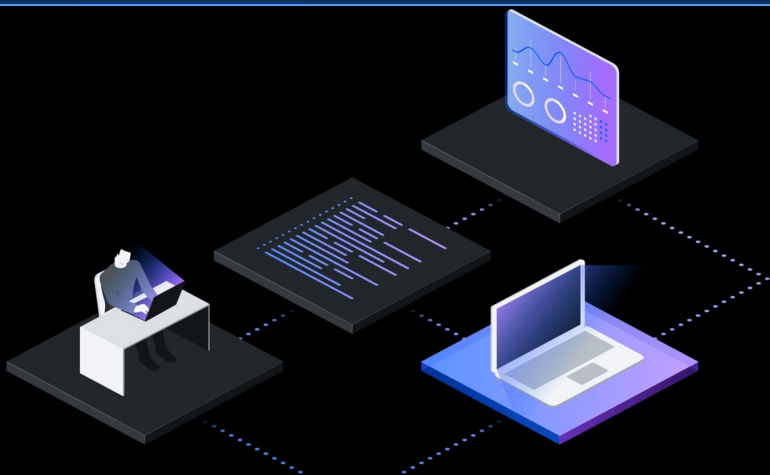

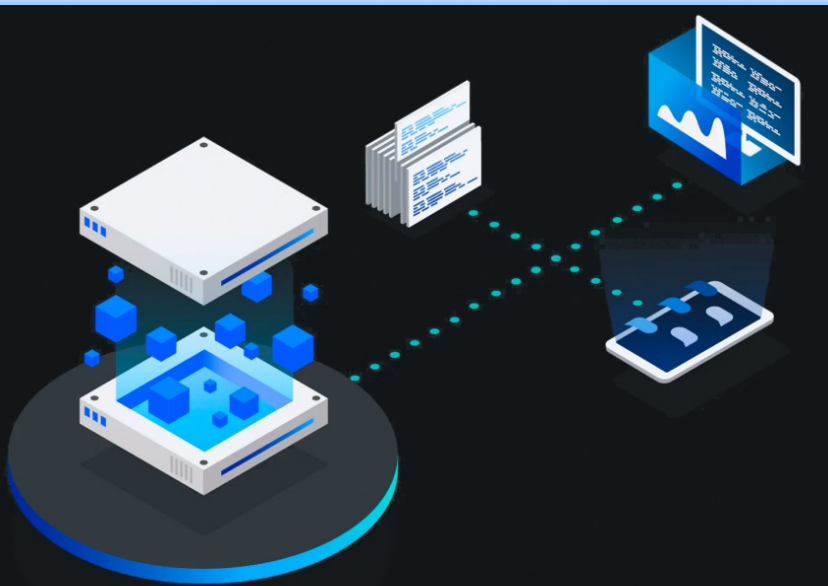

You're invited! How and where data is stored, consumed, leveraged and managed continues to evolve. Our Data Management solutions address this explosive growth in data by managing and providing access to data with unparalleled cost, elasticity, and performance. Now that new Db2 features are being delivered on a continuous delivery basis, quite a few new features have become available since the General Availability Release of 11.5.0 in June 2019. Please join us in this two-part webinar where our Db2 experts guide you through "what's new with Db2!"

Part 1: Wednesday, May 25th @ 1:00PM CST

Part 2: Wednesday, June 8th @ 1:00PM CST

Please register for a ticket for both events
